## Kim jesteśmy?

People for  
Process  
Automation

- Endress+Hauser jest dostawcą rozwiązań automatyki procesów
- Rodzinna firma szwajcarska
- Sprzedaż (2009 rok): 1.3 mld EUR
- Ponad 8.500 pracowników na całym świecie, w tym ok. 700 doktorów nauk technicznych
- Produkcja, sprzedaż i usługi na wszystkich kontynentach
- Ponad 50 – letnie doświadczenie we wszystkich gałęziach przemysłu
- Producent przyrządów pomiarowych do zastosowań w przemyśle

## Endress+Hauser w Polsce

- Biuro Centralne i satelickie Biura Regionalne w największych miastach Polski
- Zawsze jesteśmy w bezpośrednim, bliskim kontakcie z Klientem

## Techniki pomiarów obiektowych

- Jedyna firma na świecie oferująca kompletny koszyk przyrządów pomiarowych:

- Przepływ
- Poziom
- Ciśnienie
- Analiza cieczy
- Temperatura
- Rejestracja danych
- Komponenty systemów
- Usługi
- Rozwiązania

## Important cost savings done

- En 2008, 21,5 mio. liters milk treated ( 65% cow, 28% goat and 7% sheep)  
→ 130 000 liters saved in 1 year

**Cost Savings milk : 62,7K€**

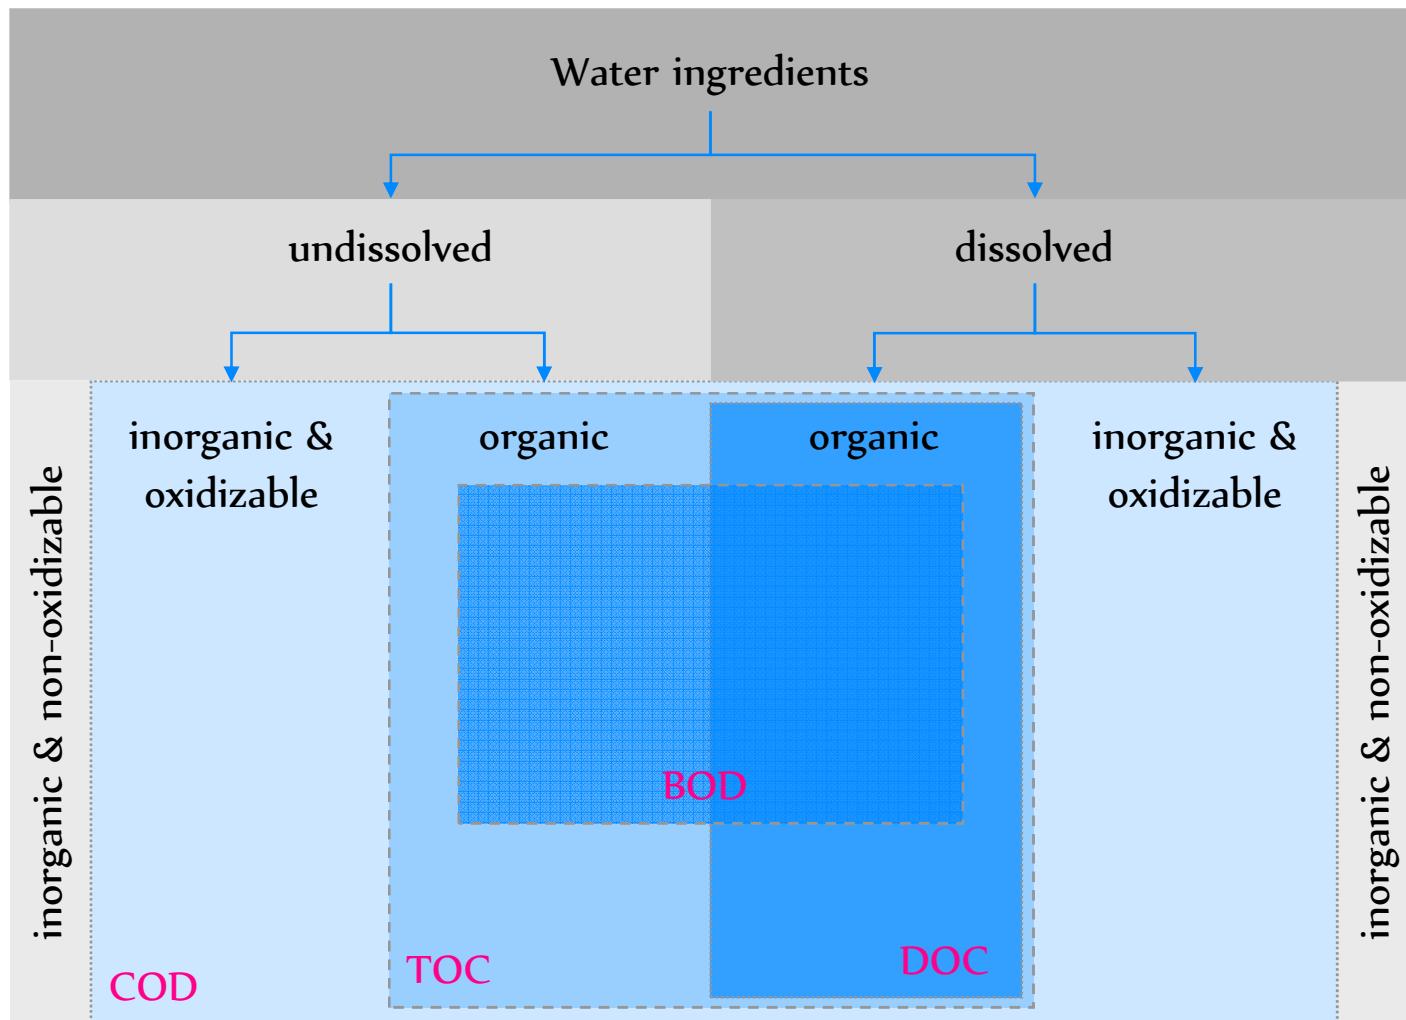

- Cost savings for the water treatment of the effluents
  - COD - 30%
  - BOD - 50%
  - Sludge volume -35%  
i.e. 7.4K€ cost savings in 1 year (treatment, valorisation, disposal...)
  - Energy -20%  
i.e. 3 k€ cost savings in 1 year
  - consumption of CO2 for pH neutralization purposes                            2 tanks less in 1 year  
i.e. 2K€ cost savings in 1 year

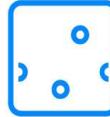

**Cost savings effluent water treatment : 12.4K€**

- Better performance of the WWTP
  - significant less odor.  
improvement for the neighborhood.

**Total : 75,1K€**

# Terminology of COD, TOC, DOC and BOD

## BIOX-1010

### Process Analyser for BOD Type BIOX-1010

- true continuous
- response time  
min. 3 minutes
- measuring range  
5-...-100.000 mg BOD/L
- sample preparation with automatically self-cleaning coarse filter
- signal outputs for control
- limit value alarms
- automatic calibration and malfunction control

## Bacteria do the work in our instrument

A large number of plastic rings provide the growth surface for the micro organisms inside the reaction chamber.

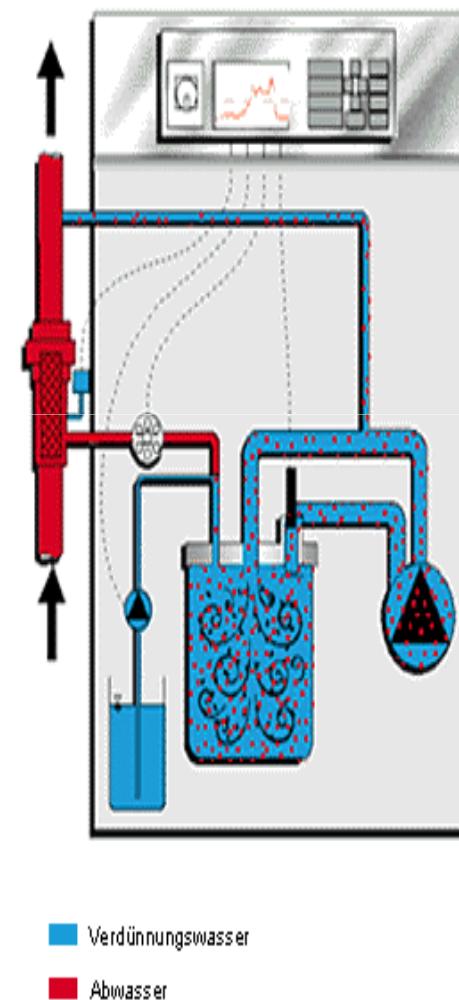

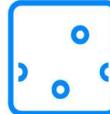

Liquid  
Analysis

## BOD-online BIOX1010

- Monitoring of all organic substances (milk; cream; fruits, sugar, proteins, lactose)
- BOD needs no reagents
- Can be used to control the load /biological processes on the WWTP
- Load calculator is included
- Fast system
- Less problems with fat, grease, lime
- Less maintenance
- Low cost of ownership
- Genius measuring principle (patented dilution method)
- Long-time reliable system
- Robust construction, no laboratory instrument
- Can be used mobile as well

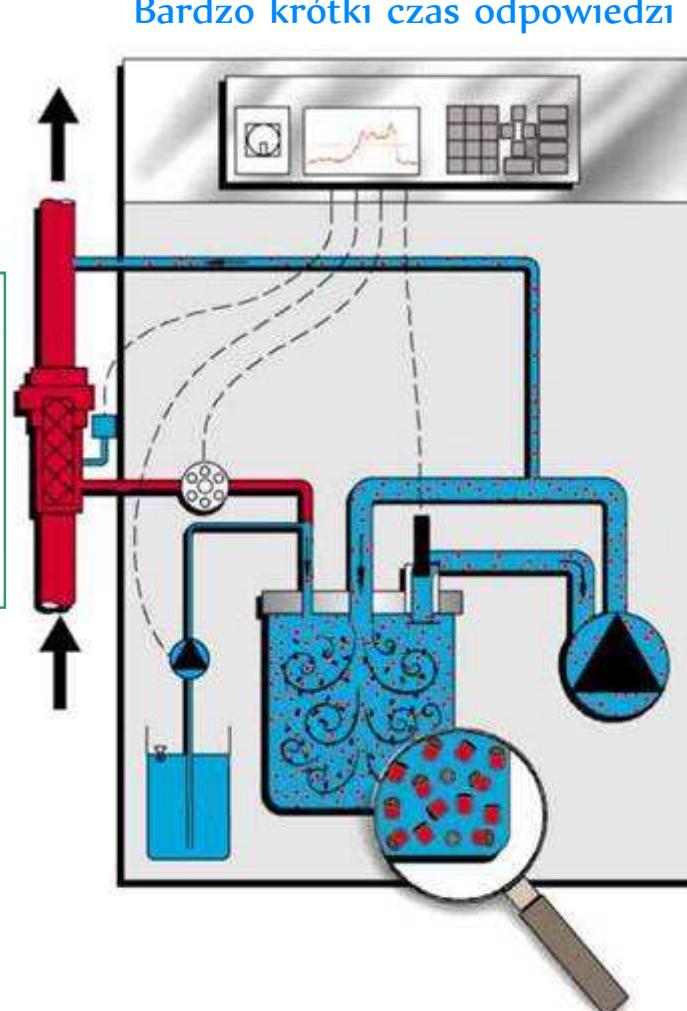

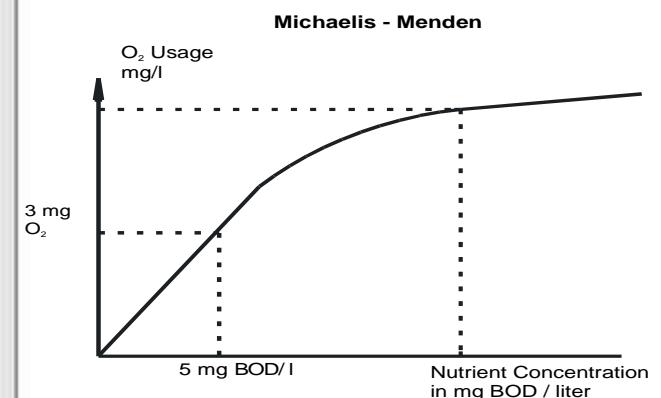

Liquid  
Analysis

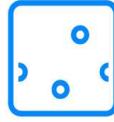

## BIOX-1010: analizator ze złożem biologicznym

Mikroorganizmy żyjące wewnętrz reaktora powodują utlenianie ładunku biologicznego dzięki dostępowi do wody zasilającej oraz zawartego w niej tlenu cząsteczkowego

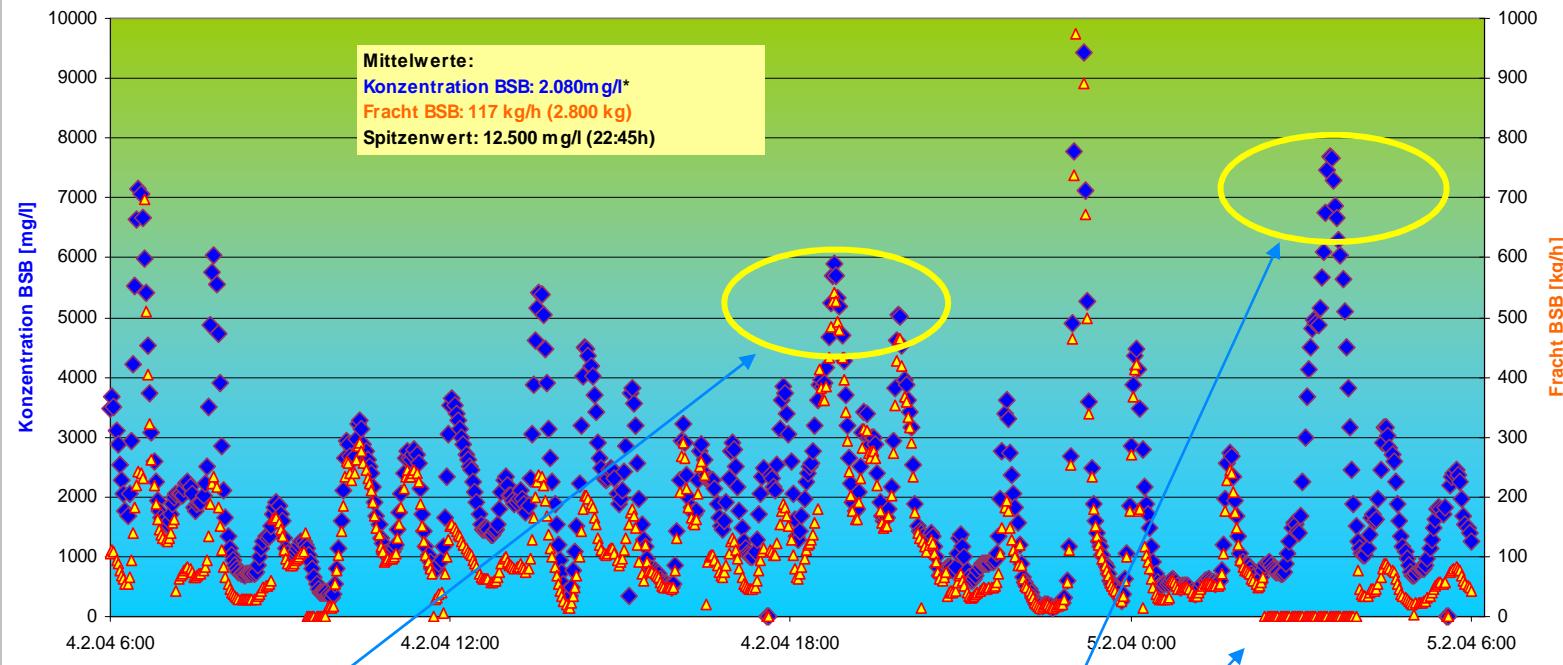

Analizator samoczynnie dozuje taką ilość tlenu do złożu aktywnego, aby utrzymywać stałą, niską wartość BZT

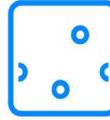

Liquid  
Analysis

## Interpretacja wyników pomiaru

Podwyższone wartości BZT oraz  
przepływu = strata produktu!

Podwyższona wartość BZT przy niskim  
przepływie = sytuacja akceptowalna

Liquid  
Analysis

## E+H solution: TOCII CA72TOC

- new TOC analyzer for industrial applications
- TOC determination by high temperature combustion
  - complete oxidation of all organic compounds
  - continuous or batch measurement
- designed and developed in cooperation with BAYER (BTS, ALISECA)
  - direct customer input and practical application tests
  - optimized for the requirements of the chemical industry

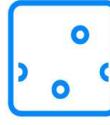

TOCII

Liquid  
Analysis

## Specifications

- Measuring Range: 0.25-600 mg/L possible up to 12,000 mg/L TOC -> with dilution up to 50,000mg/L TOC
- Accuracy: +/- 5% of reading, related to the endpoint of the measuring range (calibration solution KHP)
- Precision: +/- 5% of reading , related to the endpoint of measuring range
- Minimum Detection Limit: 1 mg/L - resolution 0.1 mg/L
- Response Time: 7 minutes
- Compliant with EPA and Standard Methods

Liquid  
Analysis

## CA71CODcr Highlights

- CA71CODcr is based on the Stamolys platform using dichromate method
- Measuring ranges:
  - 0 – 200 mg/l
  - 50 – 5000 mg/l
- Variable reaction time (10 – 180 min, default 120 min)
- Features of the CA71CODcr
  - Mercury free chloride removal
  - Needs a minimum of Dichromate to achieve reliable values
  - It is a self cleaning system

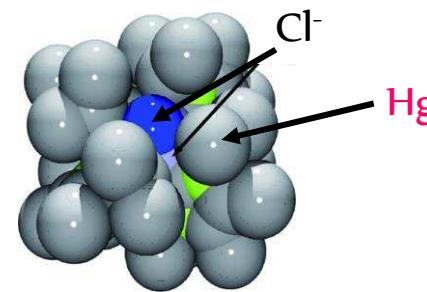

CA71CODcr

## Dichromate method: Chloride removal

Features-Advantages-  
Benefits

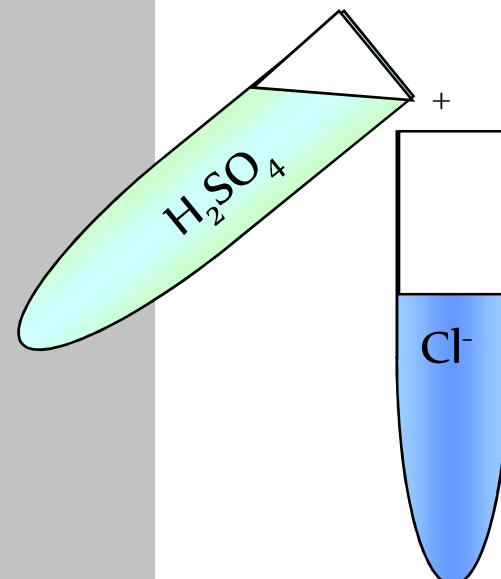

### Standard method: With mercury

80 g/l Hg salt

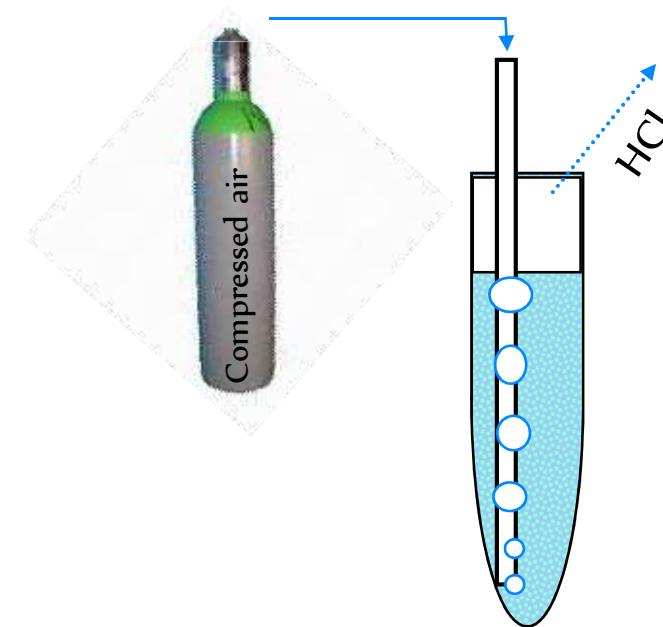

$$C_{\text{Cl}} < 1 \text{ g/l}$$

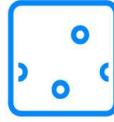

1. Acidification

2. HCl formation

3. HCl removal

Analysis

## Field tests

- Company: WWTP Leonberg  
(Leonberg, Germany)
- Industry: municipal wastewater
- Equipment: CA71COD-B  
CAT221with cutting wire pump,  
Sieve size: 50 µm
- Application: Monitoring of municipal  
WWTP inlet
- Result: Finding of a good correlation  
between laboratory volumes and  
analyzer results

Liquid  
Analysis

## Field tests

- Company: WWTP Ditzingen  
(Ditzingen, Germany)
- Industry: municipal wastewater
- Equipment: CA71COD-A  
CAT430
- Application: Monitoring of municipal  
WWTP outlet
- Result: Finding of a good correlation  
between laboratory volumes and  
analyzer results
